***NB : a project must score at least 60 to be considered, AND score at least 50% in each category; the form must be very explicit and relevant***

# Evaluation

- **Quality Assessment: *example***

- **Relevance:** the proposal demonstrates a good link with policy objectives – the goals and types of cooperation closely correspond to the need of revising and strengthening the professional profile of the teaching professions – also the use of ICT is relevant for the proposal – the objectives of the project are clearly stated and can be achieved taking into account the nature and experience of the partnership – the transnational dimension clearly adds value in terms of project outcomes – *the applicant gives little information about previous works and initiatives carried out by the participating organisation*
- **Quality of the project design and implementation:** in preparation each partner school has already identified the issues that exist in their local communities around immigration - each partner school has identified staff members who have the technical expertise to be able to support this project – while working on the theme pupils will benefit from improved digital literacy skills (camera work, sound recording and editing)
- **Quality of the project team and the cooperation arrangements:** cooperation and communication are in many forms and have been well thought through from small scale linking of pupils and staff via emails and focused Skype sessions, through to daily blogs, seminars, debates and visits - *but a clearer explanation of the task of each partner would have helped to understand if this distribution will be balanced*
- **Impact and dissemination:** good is the quality of measures aimed at sharing the outcomes of the project, *but a clearer description of the types of target groups and stakeholders involved would have helped the score*
